If you are...
⇒ raising heifers on open lots or in confinement or already grazing;
⇒ interested in pasturing your replacement heifers;
⇒ in Dane County;
⇒ and an innovator
....then we want you!

What is it?
An exciting new pilot project for dairy farmers, custom heifer raisers, and/or graziers interested in raising replacement heifers on managed pasture. This project is funded by Yahara WINS.

Advantages of Grazing Heifers on Pasture:
♦ Less cost
♦ Improved animal health
♦ Same or better growth and development of animals
♦ Proven means to reduce P loading to water

We Provide to You:
* Cost-sharing
* Expertise in establishing pastures & implementing grazing systems
* Help to improve your farm’s environmental performance

We Expect from You:
* Partner with us on this research project
* Maintain as a pasture for at least 1 growing season (we hope you will maintain it for 3 years)
